DATE MAILED: 07/26/2006

Please find below and/or attached an Office communication concerning this application or proceeding.

Office Action Summary	Application No.	Applicant(s)	
	10/826,613	MILLER, SETH A.	
	Examiner	Art Unit	
	Erma Cameron	1762	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 02 June 2006.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) ☒ Claim(s) 1-3,5,6,8-15,17,18 and 20-26 is/are pending in the application.
- 4a) Of the above claim(s) _____ is/are withdrawn from consideration.
- 5) ☐ Claim(s) _____ is/are allowed.
- 6) ☒ Claim(s) 1-3, 5-6, 8-15, 17-18, 20-26 is/are rejected.
- 7) ☐ Claim(s) _____ is/are objected to.
- 8) ☐ Claim(s) _____ are subject to restriction and/or election requirement.

Application Papers

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☐ The drawing(s) filed on _____ is/are: a) ☐ accepted or b) ☐ objected to by the Examiner.
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

Priority under 35 U.S.C. § 119

- 12) ☐ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) ☐ All b) ☐ Some * c) ☐ None of:
1. ☐ Certified copies of the priority documents have been received.
 2. ☐ Certified copies of the priority documents have been received in Application No. _____.
 3. ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).
- * See the attached detailed Office action for a list of the certified copies not received.

DETAILED ACTION

Claim Rejections - 35 USC § 112

1. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

2. Claims 1-3, 5-6, 8-15, 17-18 and 20-26 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention.

The following are not well described and/or defined in the specification:

- a) 5:7-8 - "a nucleophile of the same general class - *withdrawn*
- b) 7:29-30 - "(m)ore complicated compounds, and their oxides - *withdrawn*
- c) 7:18+21, 9:6-7, 20:6+8 - n and m and D have not been defined.

Art Unit: 1762

The applicant's assertion in the 5/3/2006 amendment that n, m and D are not important to understanding the invention is not found persuasive. It is the examiner's opinion that understanding the chemical entities involved in the claimed invention is vital to understanding the claimed invention.

d) withdrawn previously

e) In the Figures, it is not clear if the O's above the surface are supposed to be oxygen atoms, and if so, how they are attached to the surface.

Applicant's assertion that one with training in chemistry would understand how oxygen atoms are attached is not found to be a persuasive argument. Too much is expected of the reader to supply undisclosed information.

f) At 1:7 and 5:6, the applicant refers to "oxide surfaces", but elsewhere in the specification, such as 5:3, the surface is referred to as "oxidized" - *withdrawn*.

g) "form a new exposed surface" - *withdrawn*

h) withdrawn previously

i) 10:18-11:18 - "monolayer" - *withdrawn*

Art Unit: 1762

j) 2:4, 2:27 and 7:10 and elsewhere: “semimetal” has not been defined and is therefore indefinite.

3. Claims 10 and 22 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention.

a) Claim 10: “...first temperature...second temperature above the first temperature...” is new matter that was not in the specification as originally filed.

b) Claim 22: “temperature to which the coating is expected to be exposed in later processing “ is new matter that was not in the specification as originally filed. 8:25-27 refers to “temperature...encountered in the coating’s later environment”. The specification does not refer to “later processing”.

The applicant is requested to delete the new matter.

Art Unit: 1762

4. Claims 1, 13 and 25 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention.

“...a compound having a reactive group...” is new matter that was not in the specification as originally filed.

Applicant is requested to cancel new matter.

5. Claim 13 is rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the enablement requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention.

“metalloid” in claim 13 is not in the specification as originally filed.

6. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Art Unit: 1762

7. Claims 1-3, 5-6, 8-15, 17-18 and 20-26 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

a) Claim 1, line 3; claim 13, line 4; claim 25, line 3: *withdrawn.*

b) withdrawn

c) Claims 1, 13 and 25: *withdrawn*

d) Claims 5, 17: *withdrawn.*

e) Claims 9 and 21("such as"): *withdrawn*

f) withdrawn

g) withdrawn

h) withdrawn

i) withdrawn

j) withdrawn

k) withdrawn

l) Claim 22: it is not clear what later processing refers to. There is no indication in independent claim 13 that later or more processing would be done.

Art Unit: 1762

m) Claim 22: it is not clear if the later processing occurs or not, or is merely “expected”.

n) Claims 1, 13 and 25: n and m have not been defined and are therefore vague and indefinite.

o) Claim 9 and 21: D and R2 have not been defined and are therefore vague and indefinite.

In addition, it is not clear what role, if any, DR2, plays in the method.

p) Claims 3 and 15: there is no antecedent basis for “the underlying surface”

q) Claims 1, 6, 13 and 18: “semimetal” has not been defined and therefore is vague and indefinite.

r) Claim 13: it is not clear what is meant by “metalloid”.

Claim Rejections - 35 USC § 102

8. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

Art Unit: 1762

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

9. Claims 1-3, 5-6, 8-15, 17-18 and 20-26 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Ogawa et al (US2001/0031364).

'364 teaches applying TEOS [0082] or other alkoxysilanes to substrates such as glass, metal, ceramic and the other materials of [0084], followed by a fluoroalkyl trimethoxysilane as in [0145]. "...the fluoroalkyl trimethoxy silane compound underwent a dealcoholization reaction with the adsorbing water and the OH groups present at the surface of the silica-based coating film, forming covalent bonds through siloxane bonds." [0146]. The trimethoxy groups can be seen in the Figures to hydrolyze to an alcohol, and react with the TEOS on the substrate to form a water repellent fluorine-containing coating [0136] [0153]. The fluorine containing film 13 of Figure 5 is reacted with the siloxane film 12 formed from the TEOS [0147] [0148]. The methanol in the solution is removed by heating to 120-150 degrees C [0146], thus meeting the limitations of claims 10 and 22. If the applicant considers their coating, formed in a two-step process, to be a monolayer, then the coating of '364 may also be considered a monolayer, as it is formed in the same two step process.

Regarding applicant's argument that a second film is formed over a first film, the examiner disagrees. The Figures and statements in [0146] clearly indicate that the silane compound has reacted with the coating formed from the TEOS to form a new film. There are not two independent films, but rather one film as shown in Figure 5.

Art Unit: 1762

10. Claims 1-3, 5-6, 8-15, 17-18 and 20-26 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by EP 1153740.

'740 teaches applying TEOS [0089] (see Figures) or other alkoxysilanes to substrates such as glass, metal, ceramic and the other materials of [0104], followed by a fluoroalkyl trimethoxysilane as in [0130] or a trichlorosilane as in Example 1. The groups can be seen in Figure 1 to hydrolyze to an alcohol, and react with the TEOS on the substrate to form a water repellent fluorine-containing coating (see Abstract). The coating is heated after it is created [0114], thus meeting the limitations of claims 10 and 22. If the applicant considers their coating, formed in a two-step process, to be a monolayer, then the coating of '740 may also be considered a monolayer, as it is formed in the same two step process.

Regarding applicant's argument that Figure 1b) does not show bonds, Figure 1c) shows these bonds.

Conclusion

11. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Art Unit: 1762

12. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Erma Cameron whose telephone number is 571-272-1416. The examiner can normally be reached on 8:30-6:00, alternate Fridays off.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Timothy Meeks can be reached on 571-272-1423. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see <http://pair-direct.uspto.gov>. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
